

Energy and Environmental Policy

As the professional body for those working in energy, the Energy Institute plays a leading role in supporting the global transition to a low carbon economy. Through Chartered Energy Manager and Chartered Environmentalist professional registrations, our related training portfolio and extensive network of energy professionals, we are uniquely positioned to make energy and environmental management better understood, implemented and valued globally.

We recognise that with this comes an obligation to lead by example by using energy and resources in an efficient and sustainable manner wherever we operate. We are also committed to providing a comfortable environment to help our staff and volunteers provide the best services possible.

Consistent with the wider objectives of the EI, and the resources available, the EI aims to:

- incorporate energy and environmental management into EI strategies, policies and operational procedures
- continuously improve the way energy and resources are used and managed at 61 New Cavendish Street, London
- identify a prioritised list of activities or projects to form an energy and environmental management plan
- set up a science-based target and a strategy for tacking its greenhouse gas emissions in line with the UK's 2050 net zero target
- educate all staff members and raise awareness about the benefits of using energy and materials more efficiently, within the workplace and in the wider community
- maintain an appropriate level of knowledge and skills amongst relevant staff members by utilising Energy Institute energy management training programmes and resources
- maintain a good level of detail and transparency of reporting on energy consumption patterns and carbon emissions
- support the purchase of energy efficient and environmentally friendly products and services
- promote more energy efficient travel and transport patterns to minimise environmental impact
- establish and support an internal energy and environment working group to support implementation of this policy
- engage effectively with our network of professional members and topic experts to support our efforts
- show active Leadership commitment towards meeting the energy and environmental policy aims
