

Asset Management - Integrity, Ageing, Life Extension and Operational Integrity for Oil and Gas Assets

3 – 4 October 2018, Aberdeen, UK

This conference will explore the latest industry strategies regarding the wide range of issues that affect the integrity, ageing, and life extension of oil and gas assets, in addition to focusing on the fundamental interactions between people, plant and process that are critical for asset integrity.

Key topics discussed on the day include:

- Failures, inspection, and maintenance
- Life extension vs. decommissioning for particular plant types: such as compressors and structures
- Human factors: including safety critical task analysis, procedures, supervision, use of bow-ties
- Process safety management: factors such as management of change, leadership, control of work, risk assessing work arounds

Who should attend:

This conference will be of interest to managers, engineers, technical authorities and subject matter experts working in asset integrity, ageing, life extension and decommissioning for the oil and gas industry, including those with responsibilities for managing operations, corrosion, fabric maintenance, life extension, human factors, process safety, and regulation and compliance.
