The Energy Institute is a professional membership body incorporated by Royal Charter 2003 Registered charity number 1097899 The Energy Institute (EI) is the chartered professional membership body for the energy industry, supporting over 23 000 individuals working in or studying energy and 200 energy companies worldwide. The EI provides learning and networking opportunities to support professional development, as well as professional recognition and technical and scientific knowledge resources on energy in all its forms and applications.

The El's purpose is to develop and disseminate knowledge, skills and good practice towards a safe, secure and sustainable energy system. In fulfilling this mission, the El addresses the depth and breadth of the energy sector, from fuels and fuels distribution to health and safety, sustainability and the environment. It also informs policy by providing a platform for debate and scientifically-sound information on energy issues.

The EI is licensed by:

- the Engineering Council to award Chartered, Incorporated and Engineering Technician status, and
- the Society for the Environment to award Chartered Environmentalist status.

It also offers its own Chartered Energy Engineer, Chartered Petroleum Engineer, and Chartered Energy Manager titles.

A registered charity, the El serves society with independence, professionalism and a wealth of expertise in all energy matters.

This publication has been produced as a result of work carried out within the Technical Team of the EI, funded by the EI's Technical Partners. The EI's Technical Work Programme provides industry with cost-effective, value-adding knowledge on key current and future issues affecting those operating in the energy sector, both in the UK and internationally.

FOREWORD

The Company 'A' Wind Turbine Safety Rules, General Provision 4, requires the establishment of an "Approved Procedure" for dealing with Objections on Safety Reasons to the application of the Rules. This Procedure establishes that "Approved Procedure".

Company 'A' Wind Turbine Safety Rules (4th Edition) 2021

Support Procedure P3

Procedure for Objections on Safety Reasons

CHANGE LOG

Rev	Modification	Issue Date	Page
1	New document	2015	-
2	Change Log added	May 2019	2
3	Removal of RUK	Dec 2019	All
4	Renaming to WTSR 4th Edition 2021 and 'Safety Grounds' replaced with 'Safety Reasons'	June 2021	All

1 SCOPE

- 1.1 This Procedure shall be applied when any Person receiving instructions in the application of the Company 'A' Wind Turbine Safety Rules has any Objections on Safety Reasons to carrying them out.
- 1.2 This procedure shall be applied when, during the course of work, any person who has received instructions, in the application of the Company 'A' Wind Turbine Safety Rules has any objections on safety grounds to carrying them out.
- **1.3** Company Management Instructions will detail the procedures relevant to that location.

2 DEFINITIONS

For the purposes of this Procedure:

- 2.1 Management Instruction means a procedure for use at an individual Wind Farm Location or series of Wind Farm Locations, that documents additional elements of the Health and Safety Management systems of Company 'A' that are to be applied to meet specified requirements of the WTSR.
- 2.2 The 'Responsible Manager' means the Manager, appointed by Company 'A', who will have responsibility for the Plant and LV Apparatus whenever the Company 'A' Wind Turbine Safety Rules apply to it.

3 PROCEDURE FOR DEALING WITH OBJECTIONS

Any Person receiving instructions in the application of the Company 'A' Wind Turbine Safety Rules shall report to the Person issuing those instructions or, in the case of an Approved Written Procedure, the Authorising Engineer, any "Objections on Safety Reasons" to carrying them out. Any such objections shall be dealt with in the following Approved manner.

- 3.1 All Persons issuing instructions, including Authorising Engineers, shall present a positive and helpful attitude to any "Objections on Safety Grounds" and attempt, by discussion and amplification, to resolve the difficulty.
- 3.2 If the objection cannot be resolved at this level, it shall be processed through increasingly senior levels of Company 'A' line management until agreement is reached or until the difficulty is brought to the attention of the Responsible Manager, whose responsibility it is to achieve a solution to the problem.
- **3.3** If, at any stage during this procedure, the work can be rescheduled or subdivided, so that work not affected by the objections can be started, then this may be done while further consideration is given to the objections.
- 3.4 During discussion of the objection, it may be pertinent to involve the Company 'A' Health and Safety Manager or equivalent. Due consideration should also be given to involving a local Safety Representative. An example of this process can be found in Appendix A.

APPENDIX A

All Persons issuing instructions, including Authorising Engineers, shall present a positive and helpful attitude to any "Objections on Safety Reasons"
